ASSEMBLY AND RECONCILIATION RULE

1. Source PDFs are grouped only when the archived source is exact and its page count matches the history.
2. Every group cover consolidates all linked export attempts, including failures and repeated sends.
3. Recipient names, destination numbers, timestamps, page counts, and statuses are transcribed from the HP Smart export.
4. Source pages 1-3 follow once; the complete 24-page export appears once at the end and every status row links to it.

COMPILED 18 JULY 2026 · CONTINUOUS BATES PREFIX FAXR-

Unmatched history attempts remain visible in the appended full export and reconciliation CSV.
